Askari Technologies
PHP Laravel Developer

As a PHP Laravel developer, my responsibilities include designing and implementing robust web applications and APIs while ensuring code quality, scalability, and security. Additionally, I collaborate with cross-functional teams to analyze requirements and deliver effective solutions, adhering to best practices and following agile development methodologies.

Achievements

Travelta

I successfully developed a versatile website catering to multiple agencies, where each agency can register and sell their respective products or services. Whether it's a real estate agency selling houses, a travel agency offering tickets, or a hotel agency selling rooms, my website provides a seamless platform for agencies to showcase and sell their offerings. With user-friendly features and a secure registration system, the website empowers agencies to efficiently manage their inventory and connect with potential customers, resulting in increased sales and enhanced business growth.

Real Estate Agency

Successfully designed and developed a fully functional real estate agency website, Implemented a user-friendly content management system, empowering the real estate agency to easily update property listings and maintain the website's relevance. created a real estate site where users come and find there home for live or sale there proerty.

LMS

I have successfully developed a robust Learning Management System (LMS) using the Laravel framework, integrating powerful Ajax functionalities. This LMS provides a comprehensive platform for educational institutions to effectively manage and deliver online courses
